Summary

AI-focused Full Stack Developer with experience in **Next.js, React.js, and Python**, specializing in building **AI-driven web applications and responsive frontend systems**. Experienced in **API integration, real-time voice processing, and performance optimization**. Passionate about developing scalable, user-focused applications using modern web technologies.

Skills

- **Frontend:** HTML, CSS, JavaScript, React.js, Next.js
- **Backend:** Node.js, Express.js, Mongoose, REST APIs
- **Languages:** Java, Python, PHP, C, C++
- **Database Management:** MySQL, MongoDB, Firebase
- **Tools & Version Control:** Git, GitHub, Postman, Figma
- **Testing:** Unit Testing, Integration Testing
- **Web Technologies:** Web Applications, Front-End Web Development, Web Design

Work EXPERIENCE

1. Next-Gen Voice [Link](#)

- Developed a **voice-enabled AI web assistant** using **Next.js, Python, and Google Speech-to-Text**, allowing users to interact with the system through real-time voice commands.
- Implemented **low-latency voice transcription pipeline**, reducing response delay and improving interaction speed.
- Built scalable API endpoints in **Python** to process speech data and generate AI responses.

2. BlogDiary – Personal Blogging [Link](#)

- Built a responsive blogging platform using **React.js, Vite, and Tailwind CSS** supporting **50+ test users** with real-time data management via Appwrite.
- Implemented **complete CRUD workflows** and secure authentication, enabling users to create edit and manage posts with **300ms average response time**.
- Improved cross-device compatibility across **desktop, tablet, and mobile**, reducing UI-related issues by **40%** through clean, modular code practices.

3. Mobile Repaired Web Application [Link](#)

- Developed a responsive service-based web application using **Next.js (TypeScript)** improving page load speed by **~30%** through streamlined rendering.
- Applied reusable components and dynamic routing to streamlined navigation across **10+ application screens**.
- Enhanced SEO performance by implementing server-side rendering and optimized metadata, resulting in **higher Lighthouse scores (65+)**.

4. Protopage – Modern Landing Page [Link](#)

- Created a modern landing page using Next.js and Tailwind CSS, converting Figma designs into a pixel-perfect UI with 100% design consistency.
- Structured reusable components and responsive layouts to ensure consistent behavior across multiple screen resolutions.
- Followed modern frontend best practices, improving maintainability and reducing future UI changes effort by **35%**

Education

Chandigarh University

Graduated: 2025

Bachelor of Science in Computer Science

Certifications

- Python– Coursera: [Certificate](#)
- ReactJS - Infosys: [Certificate](#)

ADDITIONAL INFORMATION

- **Languages:** English, Hindi
